The 10th Jerusalem Symposium
Excited States in Organic and Biochemistry

sponsored jointly by the Hebrew University, Jerusalem, and the Institut de Biologie Physico-Chimique (Fondation Edmond de Rothschild), Paris, will be held, under the auspices of the Israel Academy of Sciences and Humanities, in Jerusalem, Israel, from March 28th to March 31st, 1977.

The aim of this meeting will be the confrontation of the present status of our knowledge about the theoretical and experimental aspects of the problem. Attention will be paid to the role of quantum-mechanical computations in this field. The collaboration of both theoreticians and experimentalists is therefore welcome at this symposium.

Correspondance and applications should be sent to Prof. B. Pullman, Fondation Edmond de Rothschild, 13, rue P. et M. Curie, 75005, Paris, France.
